

DE-STRESS

Tubs

FortiGraze De-Stress is a highly fortified, energy dense, palatable self-fed supplement. De-Stress is designed to be fed to beef and dairy cattle to help aid in recovery from high stress situations (weaning, transporting, and grouping of cattle).

De-Stress is formulated with the highest available sources of trace minerals with Zinpro® and Intellibond products to stimulate immune system and response.

The addition of prebiotics from Diamond V® Yeast will also increase the rumen bacteria population, and the use of SEL-PLEX® organic selenium aids in supporting the body's normal defense mechanism against infection.

FEEDING DIRECTIONS: Feed free choice FortiGraze® De-Stress tub to all classes of beef cattle and receiving cattle, on medium to high quality forage. As a general rule, supply 1 tub for 5-15 head of cattle.

Consumption will vary depending on quality, availability, and source of roughage, animals size, stage of reproduction, number of animals per tub and location of the tub. Calves and mature cattle should consume between 0.25 and 0.75 pounds per head daily.

ALL CONSUMPTION FIGURES STATED HERE ARE APPROXIMATE. PROVIDE FREE ACCESS TO CLEAN, FRESH WATER AT ALL TIMES.
